Summary

Motivated B.Tech Computer Science student with strong expertise in web development and AI technologies. Experienced in developing scalable applications and solving real-world problems using efficient and innovative solutions. Passionate about continuous learning and building impactful software systems.

Education

GITAM Deemed University, Bengaluru 2023 – 2027
B.Tech in Computer Science and Engineering CGPA: 7.09 / 10
Bhashyam IIT JEE Academy 2023 Class XII – 84%
Orchids High School 2021 Class X – 96.6%

Internships

AI/ML Research Intern, PathVision Innovations Pvt. Ltd. Sep 2025 – Oct 2025

- Conducted data analysis to support AI/ML research workflows and experiments.
- Assisted in model validation, testing, and documentation of research findings.

Graphic Designer Intern, InAmigos Foundation Jun 2025 – Jul 2025

- Designed posters, banners, and social media creatives for campaigns.
- Collaborated with teams to ensure consistent branding and improved engagement.

Projects

Dhanunjay Three Lenses Studio — Freelance Website Next.js, Supabase, Vercel, Nodemailer

- Developed a responsive freelance website for a photography, cinematography, and graphic design startup with interactive portfolio, services, testimonials, and animations.
- Implemented a complete booking system with date/time slots, payment receipt tracking, and real-time booking and review management using Supabase.
- Automated booking confirmations, owner notifications, and contact-form emails using Nodemailer and Resend; deployed on Vercel with GitHub-based CI/CD.

Hackathon Team Connection Dashboard React.js, Supabase

- Built a web platform to help students discover teammates and form hackathon teams.
- Developed user profiles displaying skills, experience, and availability.
- Implemented advanced skill-based search and filtering functionality.
- Integrated communication features to connect users efficiently.

Automated Cricket Statistics Pipeline Python, Pandas, openpyxl, Google Sheets API

- Developed an automated cricket statistics pipeline to scrape KSCA U-19 match data from JSONP APIs.
- Extracted and processed wicketkeeper statistics using Python and Pandas.
- Automated Excel report generation using openpyxl for efficient data processing.
- Integrated Google Sheets API for cloud-based data synchronization and Gmail SMTP for automated email reporting.
- Scheduled daily execution using Windows Task Scheduler, enabling a fully automated reporting workflow.

Skills

Frontend Development: HTML, CSS, JavaScript, React.js
Backend Development: Node.js, Express.js
Databases: MongoDB, Supabase, Sql
API Development Testing: REST API, HTTP Methods, Postman
Programming: Python
AI Tools: Generative AI, Prompt Engineering, Vibe Coding
Design Tools: Graphic Designing, Canva, Google Stitch, UI/Design, React bits
Automation & APIs: Google Sheets API, Gmail SMTP, JSONP API Scraping, Windows Task Scheduler
Version Control: GitHub
Deployment: Vercel, Netlify
Tools: MS Excel, Pivot Tables
Soft Skills: Communication, Teamwork, Time Management

Activities

- Active Member of National Service Scheme (NSS), contributing to community service initiatives.
- Participated in Smart India Hackathon 2024 (Internal Round).
